

## Is Fatigue Common in Asthma?

by NEWLIFEOUTLOOK TEAM

---

### The Battle Against Fatigue

Airway obstruction limits the amount of air that is able to get into your system and get to the muscles that need it, which can cause the fatigue in your asthma. Avoiding triggers of asthma will help to keep your airways clear. Keep a tracker on your phone that you can easily record any situation you're in that you experience your asthma. If your asthma is exercise-induced, you should build up your resiliency to exercise over time and use your inhaler, since this may help you to improve your endurance and strength.

-------------------------------------	--

## What is Fatigue?

**Fatigue is:**  
Lack of Motivation  
Lack of Energy  
Wearing Out Easily  
Real

**Fatigue isn't:<sup>®</sup>**  
Lack of Passion  
Laziness  
Just Being Tired  
Fake or Imagined

**Fatigue Can Affect:**

• Your mood	• Cognitive performance
• Physical function	• School work
• Work performance	• Community activities
• Social interaction	• Sense of self
• Family care	• Your appetite

## Measuring Fatigue

The **Fatigue Severity Scale (FSS)** is a self-reported questionnaire used to measure your fatigue. It consists of ...

### NINE Questions, each rated on a scale of 1-7

To score the Fatigue Severity Scale either add all items together (this will range from 9-63) or find the mean by adding your items together and dividing by 9 (this will range from 1-9).

In either case, the **higher the number you calculate is, the more fatigued you are.**

## Tips for Reducing Fatigue

- Quantity & Quality of Sleep**
  - ✓ Have a regular bed time and wake up time
  - ✓ Use your bed just for sleeping
  - ✓ Do quiet activities if you're not sleepy
  - ✓ Room should be dark and quiet
- Proper Nutrition**
  - ✓ Get daily value of vitamin and minerals
  - ✓ Find out about proper nutrition at [choosemyplate.gov](http://choosemyplate.gov)
